Office Action Summary	Application No. 10/540,191	Applicant(s) SALMON ET AL.	
	Examiner AMINA KHAN	Art Unit 1796	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This office action is in response to applicant's arguments filed on February 22, 2010.
2. Claims 62-72 and 85-89 are pending. Claims 1-61 and 73-84 have been cancelled.
3. Claims 62-72 and 85-89 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Baeck et al. (US 6,077,818) in view of Sando et al. (US 3,481,684) and further in view of Schneider et al. (US 6,165,761) for the reasons set forth in the previous office action.

Response to Arguments

4. Applicant's arguments filed regarding Baeck in view of Sando and Schneider have been fully considered but they are not persuasive. The applicant argues that one of ordinary skill in the art at the time the invention was made would not incorporate the desizing, pre-scouring and post bleaching alkaline method steps disclosed in Sando et al. into the washing methods of Baeck et al. because Baeck et al. do not constitute a step in a process for manufacturing a textile and that washing is not a step in textile manufacture. The examiner respectfully disagrees as Sando clearly teach several textile washing steps in the manufacture of textiles (Figure 2). Furthermore, the limitation

“manufacturing a textile” is simply intended use and does not further limit the active method steps of scouring and bleaching in the instant claims. The examiner asserts that Sando and Baeck are both directed to methods for treating similar cellulosic fabrics with hydrogen peroxide at similar pH values. Furthermore, since Sando recognizes washing steps as integral parts of his methodology nothing unobvious is seen in substituting the method steps of Baeck into the methods of Sando. Regarding the argument that surprising and unexpected results are obtained by the instant methods because it is not necessary to add a substrate for the carbohydrate oxidase, the examiner argues that applicant has not provided experimental data to support this conclusion and claim 64 requires a substrate. Applicants' arguments are conclusory statements not supported by factual evidence, see *In re Lindner*, 457 F.2d 506, 173 USPQ 356 (CCPA 1972). Accordingly, the rejections are maintained.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
